## Popular Consumable Kits Now Available for Two New Powermax Systems

### Finding the Right Consumable Now Easier Than Ever

**HANOVER, N.H.—Oct. 23, 2008**—Hypertherm, the world leader in plasma arc metal cutting technology, today announced the availability of new consumable kits for its Powermax30® and Powermax45® systems.

The kits contain the most frequently used consumables in a lightweight yet sturdy case so Powermax owners can find the consumables they need to get the job done quickly and easily. Order numbers found in each kit compartment make the reordering of individual consumables really convenient while the addition of a Powermax cutting guide offers tips to ensure the best cuts every time.

“These new kits help owners enjoy the full versatility of their Powermax systems by taking the guess work out of consumable selection. The kits are small, lightweight and ready to move with you, just like the Powermax systems,” said Erik Brine, product manager for Hypertherm genuine consumables.

The kits are available for purchase now from any authorized Hypertherm distributor. Hypertherm also offers similar consumable kits for its Powermax1000, 1250 and 1650 products. For more information, please visit [www.hypertherm.com](http://www.hypertherm.com) or call Hypertherm’s HySupport team directly at 800-737-2978.

Hypertherm designs and manufactures the world’s most advanced plasma cutting systems for use in a variety of industries such as shipbuilding, manufacturing, and automotive repair. Its product line includes handheld and mechanized plasma systems and consumables, as well as CNC motion and height controls. Hypertherm systems are trusted for performance and reliability that results in increased productivity and profitability for tens of thousands of businesses. The New Hampshire based company’s reputation for plasma innovation dates back 40 years, to 1968, with Hypertherm’s invention of water injection plasma cutting. The company, consistently named one of the best places to work in America, has more than 1,000 associates along with operations and partner representation worldwide.
