

See Hypertherm plasma and OMAX waterjet products at FABTECH Canada

HANOVER, N.H.—Apr. 5, 2022—Hypertherm, a U.S. based manufacturer of industrial cutting systems and software, is heading to Toronto for FABTECH Canada on June 14, 15, and 16. The company will exhibit the newest Hypertherm plasma and OMAX waterjet products in Booth 7050 and its Robotmaster software in Booth 9030.

Hypertherm will showcase the industry's only X-Definition class plasma and it's all new Powermax SYNC, featuring built-in intelligence and a revolutionary single-piece cartridge consumable. In addition, OMAX will present live waterjet cutting demonstrations and show how waterjet cutting can serve a range of applications from prototype development to full-scale production.

On the software side, Hypertherm will present PlateSaver, a new SureCut technology that reduces material waste to save companies money. Show attendees can also visit Hypertherm's Robotmaster team to learn more about offline robotic programming. The team will provide live demonstrations giving attendees a firsthand look at an easier, faster, and error-free programming experience.

"Though Hypertherm and OMAX have been part of the same company for a few years now, this is the first time we will demonstrate our products side-by-side in the same booth," said Betsy Van Duyne, a Hypertherm marketing manager. "We are excited to do this as we think this will make it easier for show attendees to better compare these two leading cutting technologies, better understand what each technology has to offer, and better determine which technology is right for them."

Hypertherm plasma and OMAX waterjet cutting products are engineered and manufactured for use by companies around the world to build ships, airplanes, and railcars, construct steel buildings, fabricate heavy equipment, and more. Its products include industrial cutting systems, CNCs, and software trusted for performance and reliability that result in increased productivity and profitability for hundreds of thousands of businesses. Founded in 1968 and headquartered in New Hampshire, Hypertherm is a 100 percent Associate owned company, employing more than 1,800 Associates, with operations and partner representation worldwide.
