

## Hypertherm's OMAX and Robotmaster head to Chicago for IMTS 2022

**HANOVER, N.H.—May 5, 2022**—Hypertherm, a U.S. based manufacturer of industrial cutting systems and software is preparing to exhibit at IMTS 2022. This year's International Manufacturing Technology Show, the largest manufacturing technology trade show in North America, takes place September 12 to 17, at Chicago's McCormick Place Convention Center.

Hypertherm will showcase OMAX waterjet products from Booth 236222 in the North Building. Products on display will include the all new OptiMAX, a new generation of waterjet providing faster and more accurate print to part cutting, while reducing downtime. Attendees visiting the booth can see how OMAX waterjet systems make it easy for anyone to create high-precision, complex 3D parts while enjoying live demonstrations and special show promotions.

Just across the aisle in Booth 236311, Hypertherm's Robotmaster Team will demonstrate the latest version of its offline programming software for robots. Robotmaster software takes robot programming time down from hours to minutes with an intuitive programming workflow and powerfully integrated CAD/CAM functionality.

"We are excited to return to IMTS following the COVID necessitated cancellation of the 2020 show," said Kristy Gerwig, who is managing this year's show for Hypertherm. "We believe show attendees will enjoy seeing the products we've introduced during the past two years and gain a better understanding of how our products can help them streamline their precision machining operations."

Hypertherm plasma and OMAX waterjet cutting products are engineered and manufactured for use by companies around the world to build ships, airplanes, and railcars, construct steel buildings, fabricate heavy equipment, and more. Its products include industrial cutting systems, CNCs, and software trusted for performance and reliability that result in increased productivity and profitability for hundreds of thousands of businesses. Founded in 1968 and based in New Hampshire, Hypertherm is a 100 percent Associate owned company, employing more than 1,800 Associates, with operations and partner representation worldwide.
